NLM Drug Information Resources

Databases

DailyMed: https://dailymed.nlm.nih.gov/

- DailyMed provides trustworthy information about marketed drugs. DailyMed is the official provider of FDA label information (package inserts). This Web site provides a standard, comprehensive, up-to-date, look-up and download resource of medication content and labeling found in medication package inserts.

MedlinePlus: https://medlineplus.gov/druginformation.html

- MedlinePlus Drugs, Herbs and Supplements connects consumer level drug information to patients and caregivers. Information is available on both prescription drugs and over-the-counter medicines, and includes details on side effects, dosage, special precautions, and more. Drug information is provided in both English and Spanish.

ClinicalInfo: https://clinicalinfo.hiv.gov/drugs

- ClinicalInfo offers access to the latest, federally approved HIV/AIDS medical practice guidelines, HIV treatment and prevention clinical trials, and other research information for health care providers, researchers, people affected by HIV/AIDS, and the general public.

RxNorm: https://www.nlm.nih.gov/research/umls/rxnorm/

- RxNorm provides normalized names for clinical drugs and links its names to many of the drug vocabularies commonly used in pharmacy management and drug interaction software. By providing links between these vocabularies, RxNorm can mediate messages between systems not using the same software and vocabulary. RxNorm can be accessed online through the RxNav (https://mor.nlm.nih.gov/RxNav/) browser.

Additional Training Opportunities

Drug Terminologies and RxNorm: https://nnlm.gov/classes/drug-terminologies-and-rxnorm

- This one-hour training session will introduce you to the basic concepts of medical terminologies (including what they are and why they are important), followed by a deep dive into RxNorm, an NLM-authored medical terminology specializing in drug information.
